# Online Appendix — South Korea Decoupling Replication

Jeffrey Stark

March 2, 2026

# 1 Appendix A: Data

## 1.1 A.1 Data Source and Coverage

TODO: Describe the survey instrument, fielding dates, country coverage, and sampling strategy. Include a wave-by-wave N table.

## 1.2 A.2 Variable Construction

TODO: Provide full question wording for all survey items used. Document any recoding, normalization, or index construction.

## 1.3 A.3 Sample Descriptives

TODO: Full descriptive statistics table (mean, SD, min, max, N) for all variables.

# 2  Appendix B: Robustness Checks

## 2.1  B.1 Alternative Specifications

TODO: Report results under alternative model specifications (e.g., logistic regression, fixed effects, different control sets).

## 2.2  B.2 Alternative Measures

TODO: Report results using alternative operationalizations of key DVs and IVs.

## 2.3  B.3 Sensitivity Analysis

TODO: Report any sensitivity checks (e.g., excluding outlier waves, alternative clustering).
